_____, _____, _____, _____, _____.

Figure 1. The proposed system architecture. The system architecture is divided into three main components: the User Interface, the Data Management System, and the Recommendation Engine. The User Interface interacts with the Data Management System, which in turn interacts with the Recommendation Engine. The Recommendation Engine uses a hybrid recommendation algorithm to provide personalized recommendations to the user.

§ 87(2)(b)

The **enforcement loop** is a self-referential process that maintains its identity through continuous output production, dependent on the production it claims to be free of. It is a cycle stuck in one phase because the phase blocks its own reinitiation. The **reformation space** is a phase that allows for the reinitiation of the process, but it is blocked by the enforcement loop. The **reformation space** is a phase that allows for the reinitiation of the process, but it is blocked by the enforcement loop.
